

CP Flex™ Computer NVR

The CP Flex™ Computer NVR is an exclusive line of compact, ruggedized mobile computers engineered specifically for law enforcement investigations. The open architecture Flex™ is a high performance, customizable 12-volt system available as a computer, computer with operating system, or computer with operating system and recording software. Non-proprietary connections, wide operating temperature range, built-in voltage and system protections. Compatible with full range of remote and IP modalities.

CP Flex™ Computer	
Power requirements	12 volt, 110-volt option
	2 amps (no peripherals attached)
Dimensions	8x7.25x3"
Operating temperature range	-20 to +50 C *higher operating temperature available on request
Hard Drive	500GB Temperature 0-140F
	128GB SATA (solid state) Temperature 14-158F optional
Processor	2.2 or 2.4Ghz Ghz Dual Core Processor
Memory	2GB
Standard external connections	(1) WAN 10/100Mbit, (1) LAN 10/100Mbit, (2) 2.0 USB, Monitor, keyboard, mouse
Options	
External connections	Total of (2) 10/100/1000 Mbps LAN connections
	Most combinations of card readers, removable hard drives, DVD drives common to desktop computers available at minimal cost, may increase size of computer enclosure
Operating System (choose 1)	Windows XP
	Windows Vista
	Windows Server 2003
	Embedded Windows XP
Recording Software (choose 1)	View Commander
	Milestone Systems recording software
Options:	
Internal encoder	Single camera, external BNC and RS232 connector
Internal encoder(s)	Up to 3 internal encoders, each with BNC and RS232 connector – <i>may change overall dimensions</i>
